PROJECTS

SMART BUY

E-commerce Application

April 2022

- Designed e-commerce mobile application utilizing secondary card storage app (CardBox) to automate payments and ease of transaction; resulted in a 70% increase in positive feedback from users in case study.
- Conducted usability studies, survey and quantitative analysis to understand customer sentiment and purchasing trends; produced [UX Case Study](#) (with User Journey Map) for User Personas of customers ages 17 -23, on trends and problems faced during retail shopping.

CARD BOX

FinTech Solution

March 2022

- Created a financial-technology mobile application used for securely storing all forms of payment cards in one app. Can be used as a third-party to make online purchases.
- Carried out interviews, paper & digital wireframing, low & high fidelity prototyping, usability studies and iterating on design to produce this [Case Study](#) for the design.

Other projects: Soccer News and Live Score App, [Car Rental App](#), [Food Delivery App](#) ...
